ETA-060184 mit Geltungsdauer vom 14.05.2007 bis 13.05.2012

ETA-060184 with validity from 14.05.2007 to 13.05.2012
5 Indications to the manufacturers

5.1 Packaging, transport and storage

Packaging of the components has to be such that the products are protected from moisture during transport and storage, unless other measures are foreseen by the manufacturer for this purpose.

The components have to be protected against damage.

It is the responsibility of the manufacturer(s) to ensure that these provisions are easily accessible to the concerned people.

5.2 Use, maintenance and repair

The finishing coat shall normally be maintained in order to fully preserve the ETICS's performances.

Maintenance includes at least
➢ the repairing of localised damaged areas due to accidents
➢ the aspect maintenance with products adapted and compatible with the ETICS (possibly after washing or ad hoc preparation)

Necessary repairs should be done rapidly.

It is important to be able to carry out maintenance as far as possible using readily available products and equipment, without spoiling appearance.

It is the responsibility of the manufacturer(s) to ensure these provisions are easily accessible to the concerned people.

On behalf of Österreichisches Institut für Bautechnik
